WOMEN'S PROTECTION CELL

Gender disparities are no longer silent subjects. Education is the biggest field to introduce any massive change in society. With the spreading of awareness about gender discrimination at all levels, we find many self-sustaining and crowd drawing movements by young leaders of colleges. Legal measures have also made their way into colleges and other institutions. One of them is the Women's Cell. For ensuring the safety of women and for gender sensitization on campuses, UGC recommends the need for setting up Women's Cell at colleges and universities. These cells play an important role in voicing opinions on important matters that affect the daily life of women students. They provide a platform where students can comfortably participate and share their views and actively promote gender equality. The cell is responsible for looking into any complaints filed by students and staff about women grievances at the college. The functions of the cell are to purely safeguard the rights of female students, faculty and staff members. The cell tries to incorporate hygiene habits and ensure a healthy atmosphere in and around the college.

OBJECTIVES OF WOMEN'S PROTECTION CELL

- To realize role of women in building up of a healthy society.
- To safeguard the rights of female students, faculty and staff members.
- To resolve issues pertaining to girls'/women's sexual harassment.
- To enhance self-esteem and self confidence among women students and staff.
- To foster decision making ability.
- Promoting a culture of respect and equality for the female gender in the society.
- Inculcating entrepreneurial attitude among young girls at the earliest so that they can be "job givers" rather than "job seekers."
- To extend helping hands towards deserving women charity organizations
